**Subject:** RE: Vendor contact info

Thank you, Alice. I know several flocculant vendors but this firm is one I have not used. Steve.

**Subject:** FYI: Vendor contact info

I got a call from the following vendor who has a flocculant used in geotubes that was used for the Onondaga Lake dredging project. I explained to him that the lower 8.3 miles is too early in the design process for me to discuss specific dewatering technologies with him, but that I would pass his information on to you. There is no obligation for you to contact him; this is just FYI.
